KES DERA SAMPAI MATI

Belum selesai siasatan kes dera hingga menyebabkan anak tiri perempuannya maut, rahsia seorang lelaki terbongkar apabila dia turut disyaki menodai serta mendera anak tiri keduanya yang berusia empat tahun di rumah mereka di Malau, Jitra.

Perbuatan jijik dan kejam lelaki terbabit yang menjadikan anak kedua daripada tiga beradik itu sebagai objek melepaskan geram dan nafsu serakah dikesan selepas doktor yang merawat mangsa di Bahagian Kecemasan Hospital Jitra menghubungi polis memaklumkan kejadian.

Sumber berkata, pihaknya menerima maklumat jam 4.20 petang kelmarin daripada doktor memaklumkan mangsa disyaki didera dan pemeriksaan lanjut turut mendapati ada kesan koyakan pada alat sulit dan dubur kanak-kanak malang terbabit.

Menurutnya, siasatan lanjut mendapati mangsa tinggal bersama ibu kandung serta bapa tiri dan abang sulung berusia enam tahun selain adik bongsu perempuan yang berusia tiga tahun.

"Hasil siasatan lanjut dan keterangan daripada ibu saudaranya, wanita itu memberitahu abang mangsa pernah ternampak bapa tiri mereka memegang kemaluan adiknya.

"Bagaimanapun, mangsa kini masih dalam keadaan trauma dan sukar untuk diambil keterangan selain lebih banyak berdiam diri," katanya ketika ditemui, semalam.

Beliau berkata, pemeriksaan pada tubuh mangsa juga mendapati terdapat kesan cakar pada muka, badan serta kesan gigitan di kedua-dua telinga serta bahu.

"Selain itu, terdapat juga parut luka lama akibat putung rokok di paha, betis serta kesan koyakan pada kemaluan dan dubur mangsa.

"Berikutan itu, doktor memaklumkan akan membuat pemeriksaan secara menyeluruh," katanya mangsa dan juga saksi akan dirujuk untuk menjalani kaunseling.

Jumaat lalu suspek yang berusia 22 tahun ditahan bersama isterinya berusia 26 tahun yang juga ibu kandung kepada tiga kanak-kanak terbabit selepas disyaki mendera anak bongsu perempuan yang berusia tiga tahun hingga maut.

Mangsa yang menderita akibat asma dan penyakit kulit dibawa ke hospital dalam keadaan tidak sedarkan diri sebelum disahkan meninggal dunia jam 7.30 malam.

Hasil bedah siasat kemudian mendapati kanak-kanak dikatakan sudah dua jam meninggal dunia sebelum dibawa ke hospital dan kematiannya dipercayai akibat hentakan benda tumpul hingga ususnya pecah.

Doktor juga tidak menolak kemungkinan kanak-kanak terbabit dipijak tanpa belas kasihan oleh orang dewasa, malah ibu kandung dan ayah tirinya turut mengaku pernah memukul mangsa.

Difahamkan, ibu kandung dan bapa tiri kanak-kanak berkenaan baru beberapa bulan berkahwin dengan si isteri mempunyai rekod jenayah lampau membabitkan kes curi motosikal manakala suaminya pula tidak memiliki sebarang rekod jenayah.

SHAH ALAM

Jumlah ibu bapa yang membawa anak untuk divaksin meningkat mendadak menjelang Hari Raya Aidilfitri.

LAPORAN MUKA DEPAN

Pengurus Pembangunan Perniagaan Hospital Pakar An-Nur, Norwahida Mokhtar berkata, pihaknya menerima lebih 400 kanak-kanak yang mahu divaksin pada Sabtu berbanding hanya seramai 90 kanak-kanak sepanjang Ramadan ini.

"Sepanjang bulan puasa di pusat pemberian vaksin (PPV) kami, jumlahnya turun mendadak dengan hanya 90 kanak-kanak yang datang untuk divaksin walaupun janji temu untuk setiap hari sekitar 800 orang.

"Tetapi semalam (Sabtu), kami dapat lebih 400 kanak-kanak yang divaksin melibatkan pendaftaran di MySejahtera seramai 300 orang dan selebihnya adalah walk in," katanya kepada *Sinar Harian* pada Ahad.

Menurutnya, peningkatan mendadak itu mungkin disumbangkan kerana Hari Raya Aidilfitri dan PPV itu juga akan ditutup sepanjang seminggu perayaan.

Dalam masa sama, beliau menegaskan Hospital Pakar An-Nur sudah bersedia dengan sebarang kemungkinan jumlah peningkatan anak-anak untuk divaksin pada minggu depan.

"Kalau ikutkan dalam sistem untuk janji temu kami pada hari Isnin sehingga Jumaat tidak ramai. Cuma kami tidak dapat menjangkakan dari segi walk in akan ramai atau tidak.

"Namun, kami tetap bersedia kerana bimbang akan berlaku perkara sama pada Isnin hingga Jumaat ini," katanya.

Dalam pada itu, Norwahida mengakui ia perkembangan yang baik melihat pertambahan kanak-kanak yang divaksin sekali gus memastikan golongan tersebut mendapat perlindungan sewajarnya.

THE transition to the endemic phase has been given a boost with the country reporting 10,041 Covid-19 recoveries on Saturday, almost double the number of new infections on the same day.

This marked a significant change of fortunes in the Covid-19 situation in Malaysia, which earlier this year was battling surging case numbers brought about by the Omicron variant.

However, the country appeared to have overcome the worst of the Omicron surge, with the Health Ministry announcing on Friday that the number of hospital, intensive care unit (ICU) and quarantine centre admissions had declined to under 50 per cent nationwide.

Health director-general Tan Sri Dr Noor Hisham Abdullah said 5,624 new cases were recorded on Saturday, continuing the downward trend in infections.

He said 17 of the new cases were imported.

The majority of the cases, he said, were also in the generally less severe categories 1 and 2.

"Of the 5,624 new infections, only 0.43 per cent were in categories 3, 4 and 5, and 5,600 cases were in categories 1 and 2.

"Of the categories 3, 4 and 5 cases, 10 involved those who had either received only one dose of the vaccine or were unvaccinated, eight involved those who have been fully vaccinated and six involved those who already had their booster shot."

He said 4,427,067 people had been infected nationwide since the pandemic began.

Cumulative recoveries stood at 4,310,599.

He said 89 Covid-19 patients were being treated in ICUs, and 57 required breathing aid.

Data on the Health Ministry's CovidNow portal showed that active cases had fallen further to 80,977 on Saturday.

Of the total, 97.7 per cent, or 79,149 people, were in home quarantine, two per cent were being treated in hospitals, 0.2 per cent were at Covid-19 quarantine and treatment centres and 89 in ICUs.

Dr Noor Hisham said 218 Covid-19 patients were admitted to hospitals on Saturday, consisting of 111 categories 3, 4 and 5 cases and 107 categories 1 and 2 cases.

He said one new cluster — an education cluster — was identified in Selangor, and the number of active clusters stood at 99.

He added that the national infectivity rate had also declined to 0.77.

Putrajaya had the highest infectivity rate at 1.10.

A total of 667,069 children aged 5 to 11 had been fully vaccinated under the National Covid-19 Immunisation Programme for Children. They made up 18.8 per cent of the population of the age group; 41.6 per cent of the same group had received the first dose.

With regard to teenagers aged 12 to 17, a total of 2,885,265 individuals, or 92.7 per cent, had completed the vaccination, and 2,985,091, or 95.9 per cent, had received at least one jab.

Among the adult population, 16,006,894 individuals, or 68 per cent, had received a booster dose; 22,963,872, or 97.6 per cent, had completed the second dose; and 23,240,846, or 98.8 per cent, had received at least one dose.

A total of 73,767 doses of vaccine were administered on Saturday, comprising 17,177 first doses, 53,369 second doses and 3,221 booster shots, bringing the total number of doses administered under the National Covid-19 Immunisation Programme to 70,013,893.

The Health Ministry's GitHub portal reported that nine deaths were recorded on Saturday, with Kedah registering the most at six, followed by Johor, Sabah and Sarawak with one each.
