**MINISTRY OF HEALTH MALAYSIA (MOH)
MEMBER OF THE ROYAL COLLEGE OF PSYCHIATRISTS
(MRCPsych)
PSYCHIATRY PARALLEL PATHWAY LOG BOOK GUIDE**

1.1 Introduction to Trainees, Heads of Departments & Educational Supervisors

To the trainee

This log book has been developed by the Ministry of Health Malaysia as a means of helping the trainee sitting for the MRCPsych exams and the Supervisor to review the progress of the respective trainee. It is the responsibility of the trainee to maintain and keep this log book updated from time to time. This log book would help in the assessment of the trainee's training needs and it should be made available to the respective supervisor or head of department as necessary. Although every effort has been made to make this log book as flexible as possible, certain sections may need modifications for a trainee's particular interests and requirements. Do make use of the reverse side of the printed pages whenever necessary if there is insufficient space in certain sections.

Throughout the training, the trainee should participate actively in all relevant undertakings of their respective training centres such as the care of inpatients and outpatients, perform on call duties where required, take part in community psychiatry visits, perform psychotherapy sessions, participate actively in case discussions, case conferences and other educational activities.

To Supervisors or Heads of Departments

This document should be reviewed with the trainee at the start and towards the end of their attachment. In addition to the work based assessments, this Log Book would help to establish important training needs and educational objectives that the trainee requires.

The Postgraduate Psychiatry curriculum requires the trainee and supervisor to have face-to-face supervision for an hour each week over and above the usual clinical rounds with their respective supervisor.

The Revised Curriculum for Clinical Training

The Revised Psychiatry Curriculum						
Phase	Year of studying		Formative Assessment	Summative Assessment MOE	Summative Assessment MOH as Per The Royal College Criteria	Duration
Phase 1	Year 1 (Training in general psychiatry)		Workplace-based assessment (IBA, PBA, CBD, MiniCEX, PP) Psychotherapy CBT	End of Phase 1 Theory and Clinical	PART A or B MRCPsych Theory	12 months
Phase 2	Year 2 & 3 (Placement through subspecialties in psychiatry)	Research or clinical audit		End of Phase 2 Theory and Clinical	PART A or B MRCPsych Theory CASC Clinical	24 months
Phase 3	Year 4 (Training in advanced general psychiatry, administrative & leadership psychiatry and Consultation-Liaison Psychiatry)			End of Phase 3 Consultation Viva and research/clinical audit report & presentation Placement Interview	CASC Clinical End of Phase 3 Consultation Viva and research/clinical audit report & presentation Placement Interview	12 months

Please refer to the Parallel Pathway Psychiatry Postgraduate Training Guideline for detailed information on the curriculum and training program.

1.2 Check-list for individual Training Posts

At the start of the attachment, the educational objectives stated below should be established and agreed between the trainee and the Supervisor. These objectives are not set in stone and could be used as a basic guide for the trainee.

Phase 1 - Year 1

General Psychiatry -12 months

The trainee is exposed to basic Psychiatry skills using the knowledge gained from previous training, preparation for the first parts of the examinations, courses attended and clinical experience which forms the foundation of the training for the 4 years. A firm foundation and understanding in basic psychiatry is essential and necessary before taking on more challenging cases. Trainees especially those who have never had any exposure in Psychiatry before MUST do the 12 months of General Psychiatry training uninterrupted. Exceptions would be during times of emergencies like a pandemic.

History taking and interview skills

Physical examination

Eliciting psychopathology & mental state assessment from simple to more complex cases

Eg dual diagnosis, neurocognitive disorders etc

Risk assessment for suicide, homicide, aggression and self-injurious behaviour

Being able to formulate cases and come up with individual care plans for different patients

Being able to assess patients' family dynamics and establish rapport with the family

Basic pharmacology and pharmacotherapy

Establishing networks with other departments/organizations/agencies that are involved with patients' welfare and care management

Basic and brief counselling techniques

ECT

Respecting patients' autonomy and rights

Case presentation, Journal Club participation

Basic knowledge in research/ audit protocol

Meticulous and proper documentation of case notes, ensuring the privacy of the patients are safeguarded and maintaining confidentiality

Knowledge and implementation of the Mental Health Act 2001 and Mental Health Regulations 2010

Basic knowledge in Community Psychiatry and CHMC criteria

When a trainee achieves the standards set for Phase 1, they can move on to Phase 2 of Training.

Trainees who have completed 1 year of general psychiatry training are free to sit for their Part B paper. Trainees who have had 12 months of exposure in Psychiatry before joining the Psychiatry Parallel Pathway Training program are eligible to sit for Paper B anytime they feel ready to do so.

Phase 2- Year 2 & Year 3

General Psychiatry and The Subspecialty Rotations are done during this phase.

General Psychiatry Phase 2 (Year 2 & Year 3)

Refer to Phase 1 with clinical exposure and management of more complex cases. More well versed in the principles of Psychotherapy and application. Taking on more cases requiring Psychotherapy

Psychotherapy Phase 2 (Year 2 & Year 3)

Trainees must complete 2 case protocols - one in CBT & one in Psychodynamic psychotherapy.

Child and Adolescent Psychiatry Phase 2 (Year 2 or Year 3) - 4 months

- Clinical Interview/ Assessment
- Human Development/ Psychology
- Development Disorders
- Emotional Disorders
- Eating Disorders
- Pediatric Psychopharmacology
- Pharmacotherapy
- SCAN Team work

Trainees are to ensure that Child & Adolescent Psychiatry and both the Psychotherapy are completed, signed and verified by their respective supervisors before they can be signed up as eligible to sit for the CASC examination by their Sponsors.

Research/ Audit Phase 2 & 3

Research/ Audit - Phase 2 & Phase 3

Trainees have the option to choose to do a Research or conduct an Audit. It can start during Phase 2 (Year 2 or 3) and end at Phase 3 (Year 4) of training.

Trainees are advised to start planning their research protocol or Audit from the beginning of Phase 2 with their supervisors. Trainees are also advised to ensure all existing protocols are adhered to.

Dissertation/ Audit presentation will be done at the end of Phase 3 (Year 4).

Community and Rehabilitation Psychiatry Phase 2 (Year 2 or Year 3) - 3 months

A. Community Psychiatry

- Describe the changing trends of Psychiatric care from the custodial era to the era of community-based services
- Able to plan community care for the patients
- Develop sufficient skills in managing psychiatric patients in the community
- Describe preventive aspects of Psychiatric illnesses

Obtain core knowledge in

- Community Psychiatry services in Malaysia & worldwide
- The application of National Mental Health Policy, Mental Health Act 2001 & Mental Health Regulations in Community settings
- Family interventions
- Different types of Community Care
 - o Acute
 - o Long Term/ Assertive Care
- Primary Mental Health Care- Integration of Psychiatric services in general/primary health care setting
- Concept of psychiatric prevention; e.g. primary prevention, secondary prevention & early diagnosis, promotion of mental health and relapse prevention

B. Rehabilitation Psychiatry

- Describe the concept of rehabilitation
- Describe the various types of rehabilitation
- Demonstrate ability to work in a multidisciplinary team
- Assess and plan Rehabilitation Programs for patients

Obtain core knowledge in

Different types of rehabilitation approach

- Community Mental Health Centers
- Psychosocial Rehabilitation Centers
- Vocational Rehabilitation
- Halfway House

Strategies of Rehabilitation

- Case Manager approaches
- Group Therapy
- Occupational Therapy
- Social Skills Training

Old age psychiatry (Year 2 or Year 3) - 3 months-

- Comprehensive assessment, diagnosis and treatment of Psychiatric & Neuropsychiatric which occur late in life
- Multilevel integrated care encompassing inpatient services, outpatient clinic (general geriatric mental health & memory clinic), Geriatric consultation liaison, Community Geriatric Psychiatry services
- Working with a multidisciplinary team to do Hospital-Home Assessment programme to support the elderly & empower the caregivers for better QOL in the community
- Using Multidimensional geriatric assessment method to prioritise existing problems, detect unrecognised problems
- Making individualised treatment plans taking into account patients' medical, psychological, spiritual, functional, social and environmental factors

Neuropsychiatry/ Neurology (Year 2 or Year 3) - 3 months

- Able to gather relevant clinical information (history, examination, bedside neurocognitive evaluation, investigations) to derive at a provisional neuropsychiatric diagnosis.
- Able to perform neurological (physical) examination relevant to neuropsychiatric illness
- Able to demonstrate management plans for a given neuropsychiatric illness

Addiction psychiatry (Year 2 or Year 3) - 3 months

Management of substance intoxication and withdrawal/ medically - assisted detoxification
Detailed assessment and mental state examination in people who use substances
Use of agonists and antagonist agents for maintenance therapy
Principles and practices of harm reduction approach
Use of non-pharmacological interventions eg., brief intervention, motivational interviewing, cognitive behavioural intervention, contingency management
Co-morbid psychiatric and substance use disorders
Role of other agencies, groups and disciplines

Forensic Psychiatry Phase 2 (Year 3) - 3 months

Core academic topics in forensic psychiatry
Laws relating to psychiatry
Assessment and management of cases under Sections 342, 344, 348, 350 and 351 of the Criminal Procedure Code
Risk assessment and management of violence
Writing forensic psychiatric reports
Knowledge of the Mental Health Act 2001 and Mental Health Regulations 2010
Attendance in Court – expert witness skills
Basic civil forensic knowledge

Phase 3 (Year 4)

Consultation-Liaison Phase 3 (Year 4) - 3 months

Assessment of psychiatric and physical comorbidity
Assessment of unexplained physical symptoms
Crisis management
Assessment of deliberate self-harm
Joint working with other specialties
Psychiatric treatments in special settings
The application of the Mental Health Act in Consultation-Liaison settings

Advanced General Psychiatry & Administration & Leadership Psychiatry Phase 3 (Year 4) -8 months

Managing complex cases in the psychiatric health care facilities, at the community level and liaison settings. Being an effective leader and managing human resource is increasingly becoming an integral part of a Psychiatrist's routine work. Hence, it is crucial for psychiatrists to also possess other managerial/ leadership skills to enable them to function efficiently and effectively within a complex healthcare system.

Elective Posting Phase 3 (Year 4) - 1 month

Trainees are allowed to choose any registered and recognised organisations to do their elective rotations. The objective of adding an elective posting is to give the trainees:

- A real world experience liaising with other organisations using the communication skills and values like working in partnership, networking and teamwork which are inculcated as part of their training.
- A chance to explore their individual interests in other organisations advocating Mental Health
- The experience to help contribute to both the trainees professional and personal growth.

1.3 Requirement of trainees to attempt parts of the MRCPsych Examination in the Malaysian setting

Please refer to the Parallel Programme Training Guidelines for details on sitting for Paper A & Paper B

The requirement for entry to sit the MRCPsych CASC (Clinical Assessment of Skills and Competencies) exam is:

- Has at least 24 months of training in an accredited Psychiatric Training Center prior to sitting for CASC
- Successful completion of General Psychiatry in Year 1 and has demonstrated competencies based on the formative assessments by the supervisors.
- Has passed Paper A and Paper B of the MRCPsych exam and is within the Written Paper Validity Period.
- Has completed and attained Competency in Child & Adolescent Psychiatry (at least 4 months' experience).
- Has completed BOTH Psychotherapy sessions and demonstrated competencies in both. Based on MOH criteria, Psychotherapy competency in both Cognitive Behavior Therapy & Psychodynamic Psychotherapy is deemed compulsory. Proof of competency in Psychotherapy:
 - ⊖ Completed the two case protocols and verified by the Psychotherapy supervisor
 - Completion Report by their Psychotherapy Supervisor (CBT, Psychodynamic psychotherapy)
- For the sponsorship, an authorized sponsor* will first verify that above criteria are fulfilled before sponsoring a trainee as eligible to appear for the CASC.
- The trainee is responsible to ensure that all criteria are fulfilled before applying for the CASC.

***List of authorized Sponsor**

- Consultant responsible for trainee appraisal
- Head of Department of Psychiatry
- College Tutor
- Training Programme Director
- Educational Supervisor
- Head of School
- Director of Medical Education (or equivalent)

- For further details of Pre-Membership examination requirements, kindly refer to the latest "*Eligibility Criteria and Regulations for MRCPsych Written Papers and Clinical Assessment of Skills and Competencies (CASC)*" document by the Royal College of Psychiatrists, U.K. Kindly refer to the RCPsych website for latest info.

1.4 MOH Requirement for Psychiatric Parallel Pathway Specialist Training in Malaysia

Please refer to the Parallel Pathway Psychiatry Post Graduate Training Guideline

1.4 Requirement of the candidate who has completed the minimum 4 years of Psychiatry Postgraduate training (starting from the date of commencement of training, including completion of all the mandatory rotational postings, achieves the competencies as required by the standards set and holds the MRCPsych Certificate)

- Inform the National Psychiatry Specialty Board (scan and send to mrcpsychmoh@gmail.com) & the Medical Development Division of the Ministry of Health, Malaysia by sending in your completed logbook and supervisor report.
- MOH once having verified the documents will send a list of the names of the successful trainees to the National Psychiatry Specialty Board and the Technical Head of Psychiatry in Malaysia. The Board will then make a recommendation of eligibility for gazettement training to the Medical Development Division of the MOH
- The Medical Development Division of the MOH will contact the successful trainees. Trainees will be required to submit the following documents:

- 'BORANG LAPOR DIRI SELEPAS TAMAT LATIHAN KEPAKARAN' (CPP-BOR-04)
- 'MAKLUMAT PERIBADI PAKAR/PEGAWAI PERUBATAN DI HOSPITAL-HOSPITAL KEMENTERIAN KESIHATAN MALAYSIA' (CPP-BOR-01)
- Certified true copies of your RCPsych Paper A, Paper B and CASC results
- RCPsych Certificate of Completion and Membership
- Certified true copy of your Identity Card
- Certified true copy of your service book (BUKU PERKHIDMATAN)

- The Medical Development Division would then review your documents to make sure everything is in order. Trainees would then be sent a form '**BORANG TEMUDUGA PAKAR KLINIKAL PSIKIATRI BAGI URUSAN PENEMPATAN**' with a letter mentioning the date of the exit/placement interview for gazettement training in MOH.

* Any department of Psychiatry recognized by the Conjoint Board for Psychiatry as eligible to train "*Master's in Psychiatry*" trainees is deemed to be a recognized training center.
